EYEfi Cloud

EYEfi Cloud is our next generation application platform that enables our Channel Partners and customers a secure and centralised environment to manage all of their EYEfi devices, applications and data.

The EYEfi Cloud web application securely connects EYEfi field equipment with end users, providing comprehensive information tailored to the type of deployment and corresponding application being utilised within EYEfi Cloud.

EYEfi Cloud is purpose-built with government and industry customers in mind, providing entirely new levels of situational awareness and intelligence gathering for emergency management, incident response, asset and infrastructure monitoring applications.

EYEfi Cloud Capability Plugins

EYEfi Cloud users can gain access to a variety of applications (plugins) within the platform, depending on the particular hardware you have purchased and deployed, and how it is being used in the field.

Smart Waste & Smart Drain

Fill level monitoring of waste levels to remove unsightly overflowing bins.

Monitoring of roadside stormwater pits to reduce the risk and impact of flood events.

www.fujitsu.com/au

Automated Incident Management (AIM)

Live video and GPS tracking for emergency management and incident response vehicles.

Automatic in-vehicle and cloud recording, incident record creation.

www.telstra.com

Spatial Video & SPARC

Remote asset and infrastructure monitoring and spatial intelligence gathering from fixed or mobile cameras for bushfire monitoring, marine parks, major road and rail infrastructure.

www.eyefi.com.au

Radiolert Fleet Manager

Provides management and control of EWS Radiolert over-broadcast hardware; enabling authorities to inform and instruct drivers with the appropriate course of action in various emergency scenarios.

Service and Support

EYEfi has established a network of large and reputable Channel Partners (Resellers) who sell, install, maintain and support EYEfi's technology with end customers. EYEfi Cloud is a subscription based service (volume based, tiered pricing) available through our Channel Partners, along with other value-added services such as installation, support and maintenance - and all fully backed by EYEfi.

EYEfi Cloud is fully integrated with world-class technologies such as The Things Network, Amazon Web Services and Activity's ThingPark™, and is available in all major regions around the world.

For more information and pricing, contact info@eyefi.com.au and we will connect you with a Channel Partner in your region.
